

Wireless LAN and AirMobile Server Hardware Specifications

The following specifications pertain to the computer server hardware used in the AirMobile and Wireless LAN subsystems.

The first server at a location includes the keyboard, monitor and mouse. Additional AirMobile or WLAN servers at the same location will not use a separate keyboard, monitor and mouse, but will operate via a switch connected to those included with the first server.

AirMobile master, high-tier and mid-tier site types will use the Dell 1750 hardware. AirMobile low-tier and WLAN Division HQ site types will use the Dell 650 hardware.
